I have been so interested in the concept of tiny houses for ages. This book *Tiny houses: Constructing a tiny house on a budget* is such a helpful guide. It is clearly and concisely written. Chapters are laid out in a logical and easy to read way. Highly enjoyable read and I got so many tips and ideas. I'm ready to get started.

I love the show *Tiny House Nation* and it's what inspired me to get this book. In January, my family's moving to a new, smaller house. I don't mind at all because a smaller house not only means less clutter, but also a constant design challenge for me. I loved the ideas presented in this book. They have inspired me and I listed down a few that I really, really liked in terms of planning and interior design. The illustrations were a nice addition, too. Now I'm too excited to fix my house! My only comment is that this book was short. I wish they made this longer!
