## **Customer Reviews**

This book is an excellent guide for parents who want to be able to provide their children with appropriate opportunities to focus their talents and interests into a life path. The book includes many exercises and stories of individuals and goal-setting guidelines, as well as lists of questions to ask your children to help them identify what it is they would like to do when they grow up, a question many of us still ask ourselves well into our careers. In a world of bewildering choices, this book gives parents a chance to help their children (and themselves!) find an anchor that will enrich and bring meaning to their lives. I highly recommend it--you'll refer to this book time and again

If I were to write a book on career coaching for kids, it would be EXACTLY like this. The authors have done a wonderful job in creating a book that is not only useful, but thought provoking for parents. It had me sold when they talked about following the lead of the child and feeding their interests. It seems simple enough, but when parents (naturally) view their children as extensions of themselves, it poses a significant challenge for many. With well-written wisdom that will benefit parents with kids of all ages, I highly recommend this book. The price here on practically makes it free. Get it today!

Excellent guide for parents to help themselves and their kids on career planning, guidance and choice.
