Customer Reviews

This book definitely helped me for my mammography registry! I would suggest using this book as well as the other one by the author. A few errors were within the book but overall fairly happy with it. Used both books by this author as well as the 40 hour course from Rad Comm and scored a preliminary score of 92. Good luck!

I think this book did help a lot. I just took my board exam today and scored a preliminary score of 87. You'd definitely need the other book that this author has out. I think it's the prep book. I feel there were some things I wasn't familiar with on the test, but this helped with the majority of the test.

This book contains good information. I have not taken my boards yet but feel pretty well prepared. I will say this book contains a lot of typos. Be careful when checking your answers because it may say the answer is option B but when you check the explanation of the answer it will repeat exactly the answer from option A. If you are not careful you may think the wrong answer is correct and have the wrong idea in your head. I have studied from three different sources and can usually catch it when they show a wrong answer. Overall I would say this is a good book but I would use other

sources of study as well.

This book omitted very important points during the learning process, such as FNA biopsy and Stroke Margin. There are so many misspellings and grammatical errors; classmates started to keep track of them. I do not recommend this book for learning. Very disappointed

The book really helped me prepare for the board exam.

This review was so helpful before I took my boards!! Went through everything in sections and explained answers in good detail!

Great book to study the registry ! Love all the breakdown of summary areas and questions for each section .

Haven't been through the whole book yet, but will help me tremendously for the mammogram registry review!
