Textbook Of Veterinary Histology, 1e

Synopsis

Logically organized by body system, this comprehensive resource provides in-depth coverage of the structure and function of the cells, tissues, and organs of a wide range of domestic animal species. Bridging the gap between the physiology and the gross anatomy of organisms, it also explores new discoveries being made in the areas of molecular biology and cytogenetics. Full-color coverage throughout, including more than 400 color figures that are grouped into major sections for quick reference. A wealth of electron micrographs and color micrographs demonstrate cell, tissue, and organ structure. A complete art program integrates illustrations and diagrams of cells and tissues to highlight structural-functional correlates. Helpful tables of histological features in each chapter summarize key concepts. A succinct style and format makes it easy to quickly find important information. Chapters begin with a list of key points. The author is a trained morphologist and has taught veterinary histology at the University of Florida College of Veterinary Medicine for more than 15 years.

Book Information

Hardcover: 560 pages

Publisher: Saunders; 1 edition (August 11, 2006)

Language: English

ISBN-10: 0721681743

ISBN-13: 978-0721681740

Product Dimensions: 11.1 x 8.6 x 1.2 inches

Shipping Weight: 3.8 pounds

Average Customer Review: 4.0 out of 5 stars [See all reviews](#) (3 customer reviews)

Customer Reviews

Textbook of Veterinary Histology is up to date and it contains excellent figures. However, some points on important subjects of the histology in some systems are not observed. This is the main weak point, but in general is very good to students and practical veterinarians.

I can comment that this veterinary histology book is a great help for learning a skill focus on

histopathology. Their images and explanations are clear and explicit. Otherwise I received it at time!!!thak you.SincerelyGabriel Pantoja.

excellent!!
